

Radial Fraud Insight

Gain Instant Visibility to Help You Avoid Fraud, Deliver Frictionless Customer Experiences and Convert More Orders

Merchants across segments recognize that data breaches pose a huge threat. As fraudsters gain access to stolen credentials, merchants must constantly manage risk against evolving fraud tactics.

Smart merchants know they need a fast, effective and cost-efficient way to lower transaction risk and eliminate the cost of fraud. They also want a solution that integrates smoothly with their technology and processes.

That's the advantage of Radial Fraud Insight.

Radial Fraud Insight is a sophisticated preauthorization data and analytics tool that supplements your current fraud-management capabilities. The result is a real-time high-, medium- or low-risk rating for all your transactions that Radial Fraud Insight evaluates.

The solution provides risk recommendations through a simple application program interface (API) call. You benefit from customer insights based on consortium data garnered from over 17 years of fraud management.

Radial Fraud Insight applies advanced analytics to order submissions prior to payment authorization. So it eliminates bank authorization fees for orders that wouldn't typically pass fraud screening.

Accurate Insights – and Smooth Experiences

Radial Fraud Insight combines your transaction data with the records and insights that power Radial Fraud Zero. The result is a risk-evaluation model tailored to your unique environment.

As with all our modular solutions, you can leverage Radial Fraud Insight standalone, or combine it with other Radial solutions for even greater advantage.

And with Radial Fraud Insight, you get instant, cost-effective access to our industry-leading machine-learning algorithms and consortium data. So you gain accurate visibility into transaction risk and convert more sales.
